

## OVERVIEW

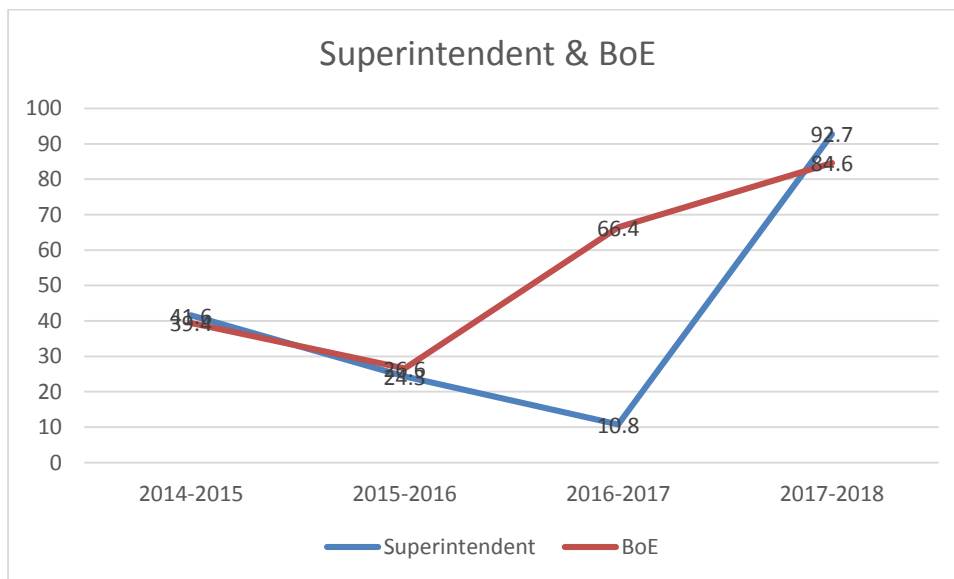

The HCEA Job Satisfaction Survey is a long-standing service provided to the Association's members and the Howard County community annually since the early 1990's. Over 3300 HCPSS employees participated in 2017-18, this represents 45% of the 7300 eligible employees. The survey is conducted by an independent firm and runs from mid-January to late February. For employees to have detailed information in the voluntary transfer process, results are released prior to April 1<sup>st</sup>. In the interest of openness and transparency, raw numerical survey data is available as downloadable Excel files at [www.hceanea.org](http://www.hceanea.org).

### AT A GLANCE

Statement	% Agree
I have confidence in the leadership exhibited by the HCPSS Superintendent.	92.7%
I have confidence in the leadership exhibited by the Howard County Board of Education.	84.6%
I have confidence in the leadership exhibited by HCEA.	93.9%
Overall, morale at my school/worksite is good.	66.3%
I am provided adequate time during the workday to plan, prepare for and do my job.	56.2%

### SUPERINTENDENT/BOARD LEADERSHIP

Confidence in the HCPSS Superintendent and Board of Education are at the highest level ever measured in this survey. Educator confidence in the Superintendent is 92.7% which is up from 10.8% in 2016-2017. Confidence in the Howard County Board of Education continues to rise. Last year it was at 66.4% and this year it rose to 84.6%.

## 2017-2018 HCEA Job Satisfaction Survey

### CONFIDENCE IN HCEA

A clear majority of educators, 93.9% are confident in the leadership exhibited by the Howard County Education Association. Notably, non-union members have high levels of confidence, 85.5%, in the Associations as well.

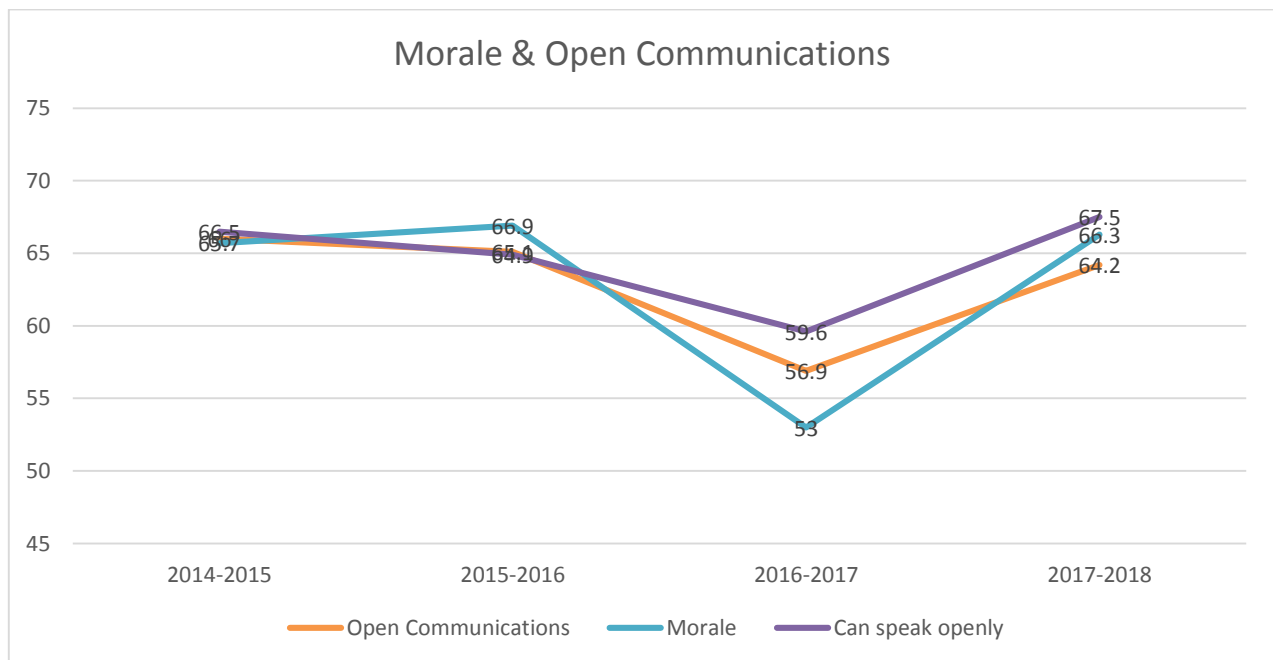

### MORALE

Agreement with the statement “Overall, morale in my school/work site is good” significantly increased from last year’s 53% to 66.3% this year. This may correlate to a decrease in respondents that believe increase workload is contributing to a decline in morale, 60.9% as compared to 71.5% last year.

In addition, educator’s feelings of an atmosphere of open communication and trust at their school has increased from 56.9% last year to 64.2% this year. The agreement that educators can speak openly without the fear of repercussions has also risen at a similar rate, from 59.6% last year to 67.5% this year.

Although these areas are trending in a positive direction, we need to do better.

Educator’s belief that their work is evaluated fairly has been continually rising. In 2014-2015 only 75.4% of respondents agreed. This year 84.7% of respondents agree. This increase coincides with the reduction of SLO’s (student assessments) within certificated educator’s evaluations.

## 2017-2018 HCEA Job Satisfaction Survey

### PROFESSION

Of the respondents, 86.7%, feel successful in their work and 83.9% feel they are treated as professionals at their school/work site. In addition, 79.6% report good teamwork among staff at their work site. Like last year, a high percentage of respondents, 91.6%, agree that administrators respect their negotiated contracts and 83.7%

agree that their planning time is respected by administrators/supervisors. The multiyear contract may have contributed to the 6% gain in educator's opinions, 45.9% to 52%, that they are paid fairly.

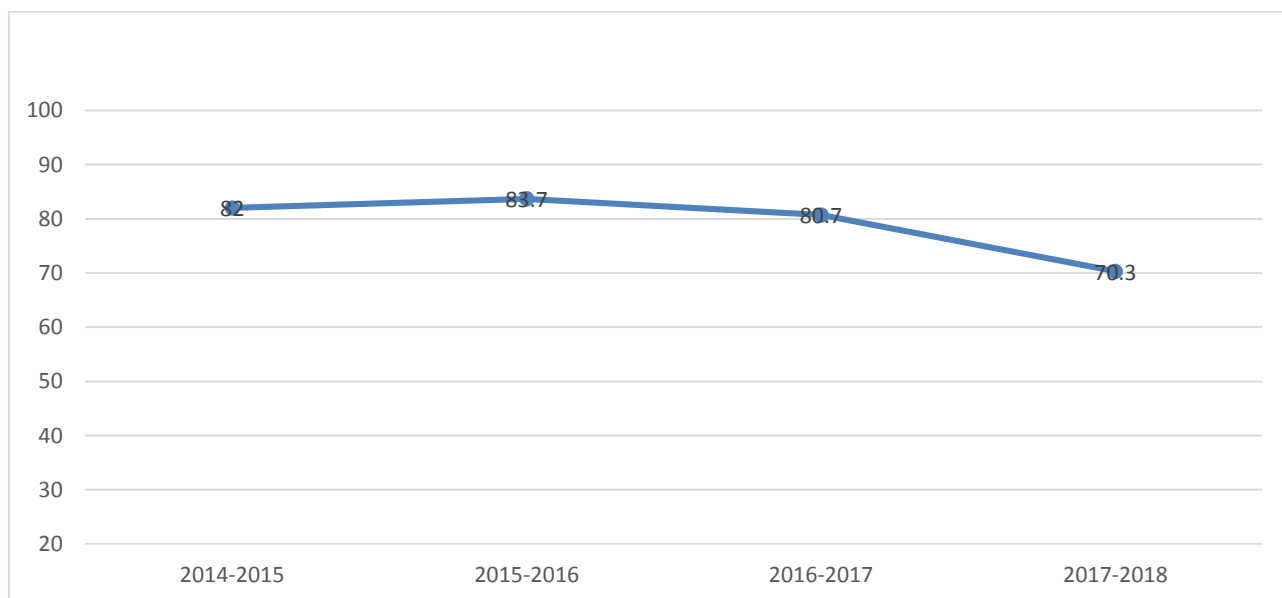

Educator's responses that their environment is conducive to success (safety and cleanliness) is holding steady at 76.7% but that is down from 81% in 2014-2015. This data coincides with the increase of square footage employees are tasked to take care of within the same number of hours.

Most respondents, 77.1%, agree the Howard County Public School System (HCPSS) offer the possibility of opportunities for advancement and 78.9% agree that they provide appropriate support and training. Compared to 39.6% of staff last year, 49.8% of staff this year felt HCPSS professional development experiences were meaningful and worthwhile.

There has been a decline in respondents agreeing, 68.7%, that administrators/supervisors support them in enforcing discipline since 2014-2015 when agreement was at 77%. At the same time, 64.4% of educators report that student misbehavior interferes with learning which is an increase from 53.1% in 2014-2015.

### EDUCATION "REFORM" and STANDARDIZED TESTING

For the first time, we have seen a significant drop in the number of educators that say there is too much instructional time spent on administering assessments. Although a clear majority still report that too much time is spent administering assessments, 70.3%, this is down from a high of 83.7%. This coincides with the legislative limits on testing passed in 2017, as well as the new Superintendent's focus on the whole student - not just their test scores.
